About Johnny:

Johnny has autism. He is five years of age. He can use a few words, but he communicates mainly with gesture and pointing.

Johnny thrives on routine, and changes in his daily routine can make him upset.

Johnny has no food allergies, but he is a very fussy eater and dislikes most foods except for Rice Crispies, peanut butter sandwiches, crackers and bananas.

Johnny is toilet-trained. To indicate he wants to go to the toilet he says "pee-pee", please bring him to the bathroom right away. Johnny uses a nappy at night time.

When Johnny gets upset, he enjoys sitting on the couch with a big blanket and looking at books until he feels better.

Johnny may not look at you when you speak to him, call his name first before you talk to him, and then communicate using short sentences he can understand.
